

Ignite – BioThinking Ideation Workshop 2017

The Einstein Center for Regenerative Therapies aims to stimulate excellent and creative research in Berlin and Brandenburg. Therefore the Einstein *Kickbox* seed grant has been developed – a funding opportunity particularly for innovative research ideas which are unconventional or are at an early stage for traditional funding.

The best ideas might be those that come about unexpectedly but sadly, they dissipate just as quickly in the daily routine of lab work. Transforming a thought into an idea and developing it into a matured concept is a process that needs a fine mix of inspiration, creativity, knowledge and new perspectives. The ECRT provides you all these ingredients and a conducive atmosphere to ignite your minds and elevate your thoughts to the next level with the help of enthusiastic peers and experienced coaches in a one-day workshop. The resulting ideas from the workshop could be developed further, until the application phase for the Einstein *Kickbox* (2018).

We warmly invite you to join the *Ignite* workshop and to generate common research ideas in multidisciplinary teams together with other participants.

Please register by following the link and filling out the google form until Friday, September 15: [Link](#) - The number of participants is limited to 20.

What: *BioThinking - Ignite 2017*

When: 28.09.2017 || 9 – 5 pm

Where: BCRT || Föhrer Straße 15 || Room 0.0043

Who: Open-minded eager scientists, clinicians or engineers from various backgrounds are welcome
+ Coaches from the *BioThinking* program

Why: Experience the power of a disruptive ideation process in diverse teams
Capture the ideas in form of *Kickbox* proposals for 2018
